Agreement between private sewer owner and Forsyth County providing adequate sewer and water service for the townhome lots.

ORIGINAL

MEMORANDUM OF AGREEMENT FOR SETTLEMENT REGARDING THE JAMES CREEK WRF BETWEEN FORSYTH COUNTY, GEORGIA AND WATERSCAPE SERVICES, LLC

The following substantive and material terms shall form the basis of a comprehensive Settlement Agreement between Forsyth County Georgia, and its officers, agents and employees, and Waterscape Services, LLC and its officers, agents and employees:

- Forsyth County will pay \$22 million for all off-site easements, contracts, accounts receivable, rights to future expansion of the service area, and all other James Creek WRF rights that Waterscape Services, LLC has via quit claim deed or other appropriate vesting instrument;
 - Prior to closing, Forsyth County shall require that Waterscape secure an appraisal a. (business and/or infrastructure) confirming the value of the items identified above is at or near \$2,2 million
 - The payments related to the contract for sewer capacity for the Overlooke at b. James Creek subdivision shall be made to and for Waterscape Services;
- Waterscape will donate the James Creek WRF plus the plant site to Forsyth County, with 2. marketable, fee-simple title to all real estate, installed membranes, fixtures, equipment, permits, plans, designs, appurtenances, choses in action, and all interests whatsoever comprising any part of the James Creek WRF, with Forsyth County to assume no outstanding liabilities (save to honor existing sewer contracts except as noted in 2.a);
- Waterscape will satisfy all outstanding debts that Forsyth County may have at the 3. Hampton WRF (currently in excess of \$400,000), and prior to closing will secure written confirmation from Hampton that Forsyth County has no outstanding balances of any kind at Hampton, save for any then-current monthly operating charges, to include a commitment by Waterscape Utility and/or Settingdown Utility to no longer bill Forsyth County for electricity charges at the Hampton WRF pertaining to pump stations that are not part of the County system;
- Ken Curren, individually, shall agree to resign his position as managing member of the 4. Hampton WRF and further agrees to the fullest extent allowed by law to have no further involvement either directly or indirectly with the James Creek WRF, the Hampton WRF [except that Curren and any member of the Curren household shall be allowed to retain their minority ownership interests in Waterscape Utility, LLC and/or Settingdown Utility, LLC - but shall not actively participate in either entity] or any other sewer plant in Forsyth County, this includes but is not limited to any customers, staff, pertinent regulatory agencies, and users of such plants, it being further agreed that this provision is a substantial and material part of the consideration of this agreement, and the parties agree that a demonstrated breach of this obligation shall result in liquidated damages of \$100,000 in favor of Forsyth County.

a. Forsyth County will not honor any refund or repurchase agreements that may be contained in contracts entered into by Waterscape and its customers

except for the James Cric. SID contracts

- The representation and warranties of Waterscape Services, LLC attached as Exhibits A and B, are adopted as material affirmations of the current condition of the James Creek WRF;
- 6. At closing Forsyth County shall receive all remaining capacity in the James Creek WRF and may sell that capacity at its then-current established rates except for the 45 ERU reserved for Gilbert Road, LLC for which the rate is \$5,130 per ERU or tap until April 1, 2012 at which time the rate may change to the then-current rate. Using a flow per day per single family home of 250 gallons per day (the historical maximum flow per tap experienced in the past four years of 189 gallons per day plus a 33% safety factor), there are approximately 1,030 taps with a present value of approximately \$5.28M.
- Forsyth County shall be entitled at closing to collect no less than \$100,000 in outstanding accounts receivable;
- Within five (5) business days of execution of this memorandum of understanding, Forsyth 8. County shall tender the purchase price into a mutually acceptable escrow account, and Waterscape shall immediately relinquish possession of the James Creek WRF to Forsyth County and Forsyth County shall immediately be obligated to commence operations and be entitled to receive all monthly sewer treatment fees for service beginning on October 1, 2010 (the current billing period); provided that if closing in hereunder shall not occur on or before the final day provided for closing in Paragraph 10 below, then any time thereafter and within five (5) business days after receipt of written notice from Waterscape Services of its intent to resume possession and operation of the James Creek WRF, Forsyth County shall surrender possession of the James Creek WRF to Waterscape Services and Forsyth County shall be obligated to account to Waterscape Services for any sewer treatment fees received by it that accrued during a period of operational control by Waterscape Services, and provided further that notwithstanding any other agreement to the contrary including the terms and provisions of this Memorandum of Agreement, Forsyth County's relinquishment of possession as contemplated above shall not be used by Waterscape or any other person or entity before any court or tribunal as a basis to assert or allege that Forsyth County has acquiesced or acknowledged in any manner Waterscape's right to possession of the James Creek WRF, as both parties shall retain the full right and authority to vindicate completely their alleged lawful right and entitlement to the James Creek WRF in any court with jurisdiction over same, to specifically include the Lumpkin County Superior Court action 06-CV-949, with it being further acknowledged that Forsyth County does specifically dispute Waterscape's right to possession and operational control of the James Creek WRF;
- 9. Forsyth County shall have a reasonable due diligence period prior to closing of no more than forty five (45) days, and in no event shall closing occur later than December 17, 2010 and Forsyth County shall close unless material deficiencies are found and are not remedied by Waterscape;
- 10. The Lumpkin County Superior Court litigation between Forsyth County and Waterscape, 06-CV-949 shall remain pending until closing, after which the parties shall jointly submit a

At closing Forsyth County shall receive all remaining capacity in the James Creek WRF, which is no less than 740 taps based on the County's assumption of 270 GPD, comprised of 543 taps that the county may sell at a price that the county establishes and 197 taps under contract (but not yet paid) that have a contractually guaranteed tap price of

mutual petition for dismissal based upon settlement with the parties to bear their own attorney's fees and costs and with no further litigation to occur between the parties related to the James Creek WRF;

- 11. The parties shall enter into a mutual non-disparagement agreement and the terms of the final settlement agreement, to the extent allowed by law, shall remain confidential;
- 12. Waterscape will work in good faith with Forsyth County to coordinate a seamless transition, and will ensure that the plant operator and Ken Curren will deliver to Forsyth county all records, documents, contracts, plats, maps, or data of any kind, be it hard copy or electronic, associated with the James Creek WRF.

Additional, miscellaneous terms

The future settlement agreement(s) will oblige Waterscape Services, LLC and Ken Y. Curren to withdraw all appeals or challenges to any County permits or permit applications of any kind lodged prior to the date of execution of the settlement agreement(s). The settlement agreement(s) will also, to the fullest extent allowed by law, obligate Waterscape services, LLC and Ken Y. Curren to refrain from commenting upon, challenging, resisting, or appealing County permits and permit application of any kind.

It is anticipated that the Settlement Agreement(s) shall include terms additional to those set forth in this proposed memorandum of understanding but shall not material alter the spirit of this memorandum. Prior to commencing negotiations of such terms the parties will agree that all negotiations will be conducted in good faith.

CHAPTER 20A. PLANNED UNIT DEVELOPMENT DISTRICT*

*Editor's note: Amendment to Ord. No. 87, adopted Dec. 20, 2004, redesignated chapter 20 as chapter 20(A).

Cross references: Planning, ch. 58.

(Amended 3-26-2001)

ARTICLE I. PURPOSE AND INTENT AND APPLICABILITY

20A-1.1. Purpose and intent.

The provisions of this chapter are intended to establish a zoning district that will:

- (a) Encourage and allow the development of tracts of land as planned neighborhoods or communities according to designs that coordinate building forms that are interrelated and architecturally harmonious;
- (b) Encourage and allow unique, flexible, creative, and imaginative arrangements and mixes of land use in site planning and development, consistent with the Comprehensive Plan of Forsyth County;
- (c) Encourage a broader mix of residential housing types, including detached and attached dwellings, than would normally be constructed in conventional subdivisions;
- (d) Preserve the natural amenities of the land through maintenance of conservation areas and open spaces within developments, provide amenities, and provide where needed the civic and semi-public uses (e.g., schools, playgrounds, meeting halls, etc.) that help to make up a community;
- (e) Provide for an efficient use of land resulting in smaller networks of utilities and streets and thereby lower development and housing costs; and
- (f) Provide an environment of stable character compatible with surrounding residential areas;
- (g) Establish application requirements that are more rigorous than the requirements for rezoning to other zoning districts but no more onerous than is necessary to enable thorough analyses;
- (h) Provide for slightly higher gross and net development densities and intensities as an inducement to develop in a manner consistent with the purposes of this chapter. (Amd. of 12-20-2004)

20A-1.2. Development as a unit.

The land within an approved planned unit development district is intended to be planned and developed by a single developer or group as a single, entire unit of land. Land within a planned unit development district shall not be subdivided and sold to others prior to completion of the installation of required improvements.

(Amd. of 12-20-2004)

ARTICLE II. USES PERMITTED WITHIN PLANNED UNIT DEVELOPMENT DISTRICTS

20A-2.1. Generally.

It is the intent of the planned unit development district to provide maximum flexibility with regard to the mixture of land uses. Within a planned unit development district, any land use, may be permitted if such use or uses can be shown to provide an orderly relation and function to other uses in the development and to existing land uses, as well as with due regard to the Comprehensive Plan of Forsyth County. The permitted use or uses of property located in the planned unit development shall be determined at the time the zoning district and development plan is approved, and development within the district shall be limited to those uses specifically requested as part of the application and approved by the board of commissioners, unless otherwise specifically noted in the board's approval of the planned unit development zoning district.

(Amd. of 12-20-2004)

20A-2.2. Recommendations.

The following principles for proposing and mixing land uses are recommended:

- (a) Uses should be predominantly residential in accordance with the use recommendations of the comprehensive plan;
- (b) Where appropriate, the planned unit development should provide for more than just one type of dwelling unit, such as townhouses, duplexes, and multi-family dwellings;
- (c) Multi-family dwellings should not comprise more than 25 percent of the total dwelling units within the proposed development;
- (d) Sites for churches, schools, community or club buildings, and similar civic or semi-public facilities are encouraged to be provided, where appropriate;
- (e) Commercial and offices uses, if proposed, should be located in careful relation to other land uses within and outside of the development; they should be scaled so that they primarily serve the occupants of the planned unit development; they should be designed and oriented to face the interior of the planned unit development rather than oriented toward passer-by traffic exterior to the planned unit development; In residential districts, the amount of land in a planned unit development devoted to commercial and office uses should not exceed 15 percent of the unit of land within the planned unit development unless it can be shown that a greater percentage of land devoted to such uses is more conducive to the mix of uses.
- (f) Industrial uses are not typically considered to be appropriate for inclusion within planned unit developments; however, such uses are not prohibited and may be proposed and approved in larger (e.g., twenty acres or more) planned unit developments where living and working areas need to be proximate to one another, subject to separation and screening requirements to avoid nuisances.

(Amd. of 12-20-2004)

ARTICLE III. PERFORMANCE STANDARDS

20A-3.1. Minimum acreage.

A planned unit development district must contain a minimum area of 20 contiguous acres. (Amd. of 12-20-2004)

20A-3.2. Dimensional requirements.

There shall be no requirements for minimum lot size, minimum lot width, lot coverage, yards and building setbacks, or height requirements that apply to planned unit developments.

Dimensional requirements shall be as proposed by the applicant of the planned unit development and as approved by the planning commission and board of commissioners via a letter of intent and detailed site plan approved during the rezoning process, and as may be subsequently shown on the sketch plat approved by the planning commission.

(Amd. of 12-20-2004)

20A-3.3. Residential density.

The maximum number of dwelling units per acre in residential areas of the planned unit development should not exceed 1.2 times the gross density recommended by the future land use map of the comprehensive plan for the unit of land unless such density is found the board of commissioners to be justified to achieve the goals of the land use plan. For purposes of this section, density shall be interpreted as the number of dwelling units per gross area devoted to residential development, and, in addition to land area and parcels used primarily for residential purposes, all open spaces including private lakes reserved for common usage within the planned unit development. Gross acreage for residential development shall exclude areas of dedicated street rights-of-way existing prior to development, and all lands devoted to non-residential uses. (Amd. of 12-20-2004)

20A-3.4. Recommendations for design.

- (a) Unless topographical or other barriers protect the privacy of existing adjoining uses, structures or buildings located at the perimeter of the planned unit development should be setback a distance of at least 100 feet to protect the privacy and amenities of adjacent, existing uses.
- (b) Structures or buildings located at the perimeter of the development should be permanently screened in a manner that sufficiently protects the privacy and amenities of the adjacent, existing uses.
- (c) Portions of the development containing commercial and office uses are specifically encouraged to conform to the general site development and design regulations for commercial and office zoning districts as specified in chapter 12, article X of this Code.
- (d) Planned unit developments of sufficient size are specifically encouraged to conform to the design guidelines for activity centers provided in chapter 13 of this Code, as may be considered appropriate to the specific land development context.
- (e) Residential portions of planned unit developments that are intended to be subdivided are specifically encouraged to conform to provisions for conservation subdivisions as specified in chapter 19 of this Code, as may be considered appropriate to the specific land development context.
- (f) Land uses proposed to be a part of a planned unit development that have Code provisions specifically pertaining to such uses, as specified in chapter 16 of this Code, will typically be expected to comply with the applicable requirements of chapter 16, unless specific reasons can be show why such requirements should not apply. (Amd. of 12-20-2004)

ARTICLE IV. APPLICATION REQUIREMENTS AND PROCEDURES

20A-4.1. Revisions.

Amendments to approved planned unit developments shall be permitted but governed by the modification process established in article IX of chapter 8 of this Code.

ARTICLE V. PERMITS AND CERTIFICATES

20A-5.1. Building permits.

The planning and development department shall issue building permits for buildings and structures in the area covered by the approved sketch plan for a planned unit development if they are in substantial conformity with the approved planned unit development, in accordance with the development schedule, after improvements are installed in accordance with applicable improvement requirements in accordance with approved construction plans for said improvements, and if found to be in conformance with all other applicable regulations. (Amd. of 12-20-2004)

20A-5.2. Certificate of occupancy.

The planning and development department shall issue a certificate of occupancy for any completed building or structure located in the area covered by the planned unit development if it conforms to the requirements of the approved planned unit development and all other applicable regulations.

(Amd. of 12-20-2004)

20A-5.3. Other permits or certificates.

No work, including, but not limited to, grading and other land disturbing activities, which requires permits or certificates, shall be commenced in a planned unit development until all permits or certificates required under other provisions of this Code are obtained. (Amd. of 12-20-2004)

20A-5.4. Control of area following completion.

After completion of a planned unit development, the use of land and construction, modification or alteration of any buildings or structures within the area covered by the planned unit development shall be regulated by the planned unit development and approved sketch plat and construction plans as well as other applicable provisions of this Code.
